

Web & Marketing Data Analyst

Minkoo Kang | minkoo.kang@dkwage.com | dkwage.com (Portfolio) | (+82) 10-5879-7966

SUMMARY

- B.A./B.S. candidate in Media Communication and Data Science with hands-on experience integrating digital marketing platforms, building analytical dashboards, and analyzing cross-channel communications performance. Passionate about applying data analytics to strengthen organizational communications in international and multicultural environments.

EMPLOYMENT

- **OOA Inc.** Incheon, South Korea
Performance Marketing Intern Aug. 2023 – Dec. 2023
 - Built a centralized data tracking platform connecting multiple digital marketing channels (Meta Ads, Google Ads, Naver), implementing schema standardization and validation rules to enforce data quality and governance across platforms.
 - Modeled channel-specific budget and performance data using Linear Regression to forecast expected ROAS under concentration scenarios, driving a 5.3x increase in campaign ROAS.
- **JSCODE** Incheon, South Korea
Brand Marketing Intern Feb. 2023 – May 2023
 - Analyzed multi-channel user acquisition and conversion data across Instagram and YouTube to diagnose structural performance inefficiencies, executing a data-backed channel consolidation strategy that reduced reporting discrepancies by centralizing tracking into a unified dashboard.
 - Integrated audience insight data into campaign messaging framework, achieving a 4.3x increase in conversion rate during a 3-month period.
- **Inha University International Office** Incheon, South Korea
Administrative Intern Jun. 2022 – Sep. 2022
 - Managed EN-KR localization and content updates for global program communications, ensuring culturally aligned messaging with high attention to detail across cross-cultural contexts.
 - Supported international events for students from 10+ countries, demonstrating strong adaptability and collaboration within a multicultural institutional environment.

SELECTED PROJECTS

- **Public Media & Sentiment Analysis Pipeline** [GitHub] Incheon, South Korea
Joint Project: Inha University and Michuhol-gu District Office May 2026 – Present
 - Constructed an automated data pipeline to extract, clean, and preprocess engagement metrics and text data across major social media and public communication platforms, enabling scalable media monitoring.
 - Applied NLP models to conduct sentiment analysis on cross-platform media coverage, delivering statistical evidence that informed the district office's future communication strategy.

EDUCATION

- **Inha University** Incheon, South Korea
B.A. in Media and Communication & B.S. in Data Science 2022 – 2027 (Expected)
 - Coursework: Customer Data Analysis, Data Science Programming, Advertising and Communication Planning

AWARDS

- **Yonsei University Startup Competition** Aug. 2022
Rated A (Top Tier) with 1,000,000 KRW Scholarship

EXTRACURRICULAR ACTIVITIES

- **President** Mar. 2022 – Nov. 2023
Inha University Advertising Club 'CreAD'
 - Led a 30+ member team to plan and execute a large-scale Seoul Metro advertising campaign across 20 stations, tracking multi-channel public visibility metrics and coordinating cross-functional teams to meet strict brand compliance standards.

SKILLS & LANGUAGES

- **Data:** Power BI, Google Analytics, Excel (Advanced Dashboarding), SQL, Python (Pandas, Scikit-learn, SciPy)
- **Platforms & Integration:** APIs & Data Connectors, Marketing Automation (Meta Ads, Google Ads), CRM Data Flows
- **Languages:** Korean (Native), English (Fluent — OPIc IH, TOEIC 940)
